THAMER LEFI

Fullstack Javascript Developer

About Me

I possess a strong technical background and a passion for creating innovative and efficient web applications., I am equipped with a comprehensive understanding of Full Stack JavaScript. With hands-on experience gained through a rigorous Full Stack JavaScript Bootcamp at GOMYCODE, I have honed my skills in front-end and back-end development, as well as database management. I am well-versed in the latest front-end and back-end development frameworks and tools.

Music, Sport, football

PROJECTS

Website creation
Tech-Shop (e-commerce)
a feature-rich e-commerce platform developed using the MERN stack. The project focuses on providing a seamless shopping experience for users and efficient management tools for administrators.

Technogies: React js, Redux Toolkit, Bootstrap, Express.js, MongoDB, JWT (JSON Web Tokens), Cloudinary, Stripe.js.

Features:
-**Admin Dashboard:** CRUD operations for products, user management, and order updates.
-**User Profile Management:** Users can update info and profile photo.
-**Shopping Cart & Checkout:** Seamless experience with Stripe.js integration.
-**Product Interaction:** User comments, ratings, and advanced product filtering.
-**Pagination:** Efficient navigation through product listings.

Achievements:
- Implemented secure user authentication and authorization.
- Successfully integrated Cloudinary and Stripe.js for enhanced functionality.
- Developed a responsive and scalable e-commerce solution.
